

How to care for Cannula

An Absolute Must Do

One of the most important things you can do to avoid the risk of getting sick from bacteria or germs, is to wipe the nasal prongs with alcohol. We recommend keeping packs of one time use alcohol swabs on hand and in easy reach at all times. You should not use anything milder than

alcohol to clean the cannula, as with a milder cleaning alternative it may not kill all the bacteria and germs present.

Recommended Cleaning

It's recommended by most physicians to clean your cannula daily by soaking it in warm water with a small amount of dish detergent and white vinegar. The white vinegar naturally kills bacteria and germs and won't cause deterioration or break down of the cannula like most cleaners would. After soaking the cannula, be sure to rinse it well and hang it up to dry before use.

Recommended cannula change out frequency

Most Doctors and Physicians recommend replacing your cannula every 2 weeks. This also helps keeps cannula fresh, soft, clean & Comfortable. Services like www.DollarCannulaClub.com are a great way to make sure you have a months supply of new cannula delivered to your home.
